

Riprap Installation

Concrete Embankment

Access Road

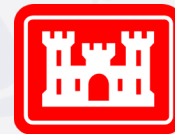

Mill Creek Remedial Repairs

Contract Number: W912QR-14-D-0023-001
Client: USACE, Louisville District
Location: Cincinnati Ohio
Cost: \$2,127,413
Award Date: 09-10-2015
Completed: 09-16-2016

This civil project consists of both repairs and new construction. The site also contains potential industrial and commercial chemical hazards, requiring environmental remediation.

Our work included the clearing of woody vegetation from the side slopes of the stream; installation of new riprap channel protection on the side slopes; construction of a new articulated concrete block access ramp, and the installation of a new aggregate cross vane.
